

Eastridge Mall Lighting Scheme

Marc Daja Elbasani

Project Type:
Professional

Office:
ELS Architects

Supervisor:
Jamie Rusin

My effort in this task involved creating the images necessary to support another architect's design for Eastridge Center in San Jose, California. The challenge here lay in the geometry of the conical form, which had two circles, offset from one another. Such a form cannot be displayed as a flat plane, presenting a problem both in electronic and physical modeling.
